ARE YOU PREPARED?

- In the event of an emergency protect your valuable papers with the software already installed on this flash drive. The sole purpose of which is to combine scanning with data input, notes and PDF import to store and print all your families documents following an organized and detailed script of categories (see inside).
- Neither the program or data ever resides on the host computer or floats across the internet. This assures privacy, portability and security. Take it with you when you travel and plug it into any computer when needed.
- The flash drive is the size of a credit card or smaller and plugs into any USB port. The data files are encrypted and password protected.
- A portion of each purchase goes to one of these worthy groups: Veterans | Firefighters | Police Officers | Red Cross Disaster Relief
- Buy an extra copy and we'll donate it to a member of the military.
- Tell your friends. Email this link www.protectmypapers.com to them.
